

## Voice Chat

Friendly, open-minded “men and women from next door“ get to know one another during our voice chats without long periods of waiting and searching. Here, they are able to talk about **EVERYTHING** unhindered, in total privacy and discreetly. This is 100% one-to-one chatting: nobody else is listening, and everything proceeds totally anonymously.

The unique feature of this chat is that we have only genuinely private individuals in our pools. We do not pay professional presenters or smuggle them into the service. This sets us apart from our competitors and represents the USP of this service.

### And this is how it works:

Men dial into the service via a 09005 number (€ 1.99/ Min.) and reach the arvato mobile platform. Here, male callers are connected with available (waiting) women in a totally uncomplicated manner according to the carousel principle and firmly defined priority rules.

Women reach the arvato mobile platform free of charge via a 0800 number (Girls' Line). This ensures that we always have a sufficient selection of women and no caller needs to wait for a connection for long.

Further proof of quality is provided by our real-time checks: the arvato mobile team screens all callers for their minimum age of 18 on the basis of brief verbal personal data inquiries at the start of the Girls' Line (querying and live checks on first name, **age** and town).
